PRESS RELEASE

Vintara Announces the Launch of its ISO9 Brand Test and Calibration Lab Industry Solution

OAKLAND, CA., March 3, 2003 – ISO9 (a Vintara brand), the leading provider of fully automated, Web-based enterprise quality management solutions and services, today announced the launch of its fully integrated Test and Calibration Lab solution designed to support compliance to ISO 17025 (General requirements for the competence of testing and calibration laboratories).

With the launch of this new offering, ISO9 now delivers a complete solution to the requirements of ISO/IEC 17025 by providing the technology and industry expertise that will ensure a company is able to achieve and maintain compliance effortlessly. Fully integrated with a company's existing quality system, the new solution manages the complete calibration process ensuring the precision, accuracy and repeatability of results by incorporating functionality that enables users to easily demonstrate technical competence and compliance.

Through the implementation of the Test and Calibration Lab solution a company gains access to a complete range of templated content, including quality manual, set of procedures and processes, and calibration and testing forms. Powered by the Vintara application, this new compliance solution delivers simplified tracking and storage of reports and calibration certificates, test methodology and validation, along with streamlined measurement traceability capabilities. With automated tasks and a centralized database, a company is able achieve compliance faster and be on their way global recognition of their products.

"With the globalization of trade and businesses becoming increasingly international in scope, accreditation of a companies testing and calibration facilities is more important than ever," notes Glenn Kohner, Vintara Chairman and CEO. "ISO9 now delivers a complete solution to ISO 17025 compliance that enables the enterprise to achieve their goal of obtaining a globally recognized registration as quickly and efficiently as possible, while benefiting from the ability to seamlessly integrate all their quality related functions into a single platform."
